

Lesson 3.3: Events

Describe something you do that is a sequence.

When would a loop be helpful in your everyday life?

How does the light get energy to turn on?

Light Show

What parts did you use?

What code did you create?

What did your code do?

How did you identify the necessary components?
 What are you doing?
 How would you describe the process to another student?
 What pieces of information do you need in order to complete this project?

Wrap Up

Write down two things you learned today.

Write down one question you have about today's lesson.

Write down one problem you've encountered, if and how you were able to resolve it.
